

# Community Leadership Teams

Do you ever wonder what you could do to make a difference in your community?

Would you like to use your passion for working with individuals with disabilities or their families?

Would you like to join with others with the same passion to build a more caring community?

## You Can Make a Difference

### What is a Community Leadership Team?

A group of residents working together with the Aging and Disability Resource Center's Outreach Coordinator to implement the Community Living Network Project.

### What is the Community Living Network Project?

The goal of the project is to work with individuals, community partners, families and others members within an **Asset-Based Community Development** framework to increase their capacity to provide community-based care to support people with developmental disabilities to improve and maintain their health and independence.

The project will work to create community circles of care and support by connecting families and individuals with disabilities to other people in the community who are also interested in this issue.

### What is Asset-Based Community Development?

Asset-Based Community Development builds on the assets that are already found in the community and mobilizes individuals, associations, and institutions to come together to build on their assets -- not concentrate on their needs.
